ENTRY MODEL / SHARPENER

# SKG SERIES

## KITCHEN Sharpening stones

This whetstone produces a lot of slurry and is easy to sharpen with.

This series of whetstones prioritizes ease of use, making it easy for even beginners to grasp the sharpening technique. The soft setting allows for good slurry production, enabling quick sharpening comparable to professional-grade whetstones. This series comes in a cost-effective, simplified package.

**Absorbency** \*Please soak in water for 5-10 minutes before use.

**Size 3**

**SKG-21**

Whetstone size Apr. 183×63×27mm  
Apr. 630g Q'ty/carton 20 pieces

Value Price **3,000 yen (excl. VAT)**  
4966684061798

**Includes a tilting stand with a water receiving tray**

This double-sided whetstone features a drip tray to keep your work area clean and an angled base for easy sharpening.

It won't make a mess with water or slurry from the whetstone.

Because the base is tilted, you can sharpen while maintaining a consistent angle.

**SKG-33**

**Kitchen Two-sided Whetstone (White) #1000 / (Orange) #280**  
comes with an angled base and a water trap

Whetstone size Apr. 183×63×27mm [13mm×2]  
Apr. 1150g Q'ty/carton 6 pieces

Non-slip Sheet for Whetstone

Size Apr. 250×125×2mm Q'ty/carton 12 pieces

Value Price **1,500 yen** (excl. VAT)  
4966684101197

Sold  
separately

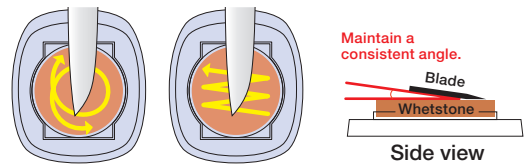

# Sharpening Plate

Simply move it across the whetstone at a consistent angle to sharpen it.

Sharpening that's quick and easy when your knife no longer cuts. Conceived as a way to sharpen freely rather than in a fixed pattern. With the whetstone held at a certain angle, sharpen by rubbing lightly with one hand. With the water collected, the area around the workspace doesn't get dirty.

Usage video

Maintain a consistent angle.

Blade

Whetstone

Side view

With the whetstone held at a certain angle, simply move in a circular or zig-zag motion to sharpen.

If the knife gets dull while you're cooking, you can quickly sharpen it. **It's important to maintain a consistent motion.**

# KC Sharpener

The KC series sharpeners are a long-selling series that offers a balanced combination of ease of use, price, and quality, ensuring reliable performance. Various types are available, allowing you to choose the perfect sharpener for your specific blade type and application. Replacement rollers are also sold separately, ensuring long-term use.

Soak the roller stone in water for 5 to 10 minutes before use to ensure a smooth grinding finish.

## TRIPLE SHARPENER PRO

The Triple Sharpener [Pro], the flagship model of the Suehiro KC Series, designed with a focus on "functionality," "quality," and "ease of use"

Usage video

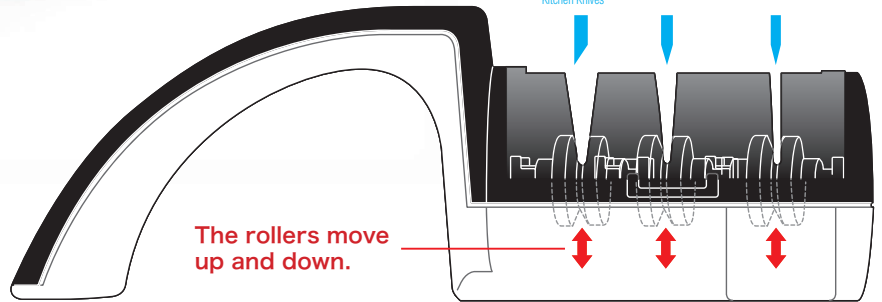

Water Sharpening

With suspension feature

The suspensions (PAT function) on the three whetstone rollers make sure the rollers fit the entire blade with a constant pressure.

The rollers move up and down.

# SHOOTING STAR

This product consists of two different types of roller sharpeners. The diamond roller can sharpen hard blades and the ceramic roller can whet effortlessly. Great versatility will be achieved by using the former for stainless-steel knives and the latter for ceramic or single-edged knives. The suspension feature (PAT.P) built into the bearing part of each roller keeps the edge in place and maintains consistent strength to whet smoothly. The inner part of the handle of the #1000 ceramic whetstone can sharpen knives which are not suitable for roller sharpeners. The #1000 is also suitable for final finishing after using roller sharpeners. This product can be used as a stick type sharpener by holding it. Handy for quick edge restoration when the edge becomes dull.

Soak the roller stone in water for 5 to 10 minutes before use to ensure a smooth grinding finish.
