HOBBY SERIES

Whetstones for Carving Knives Non-absorbent

Sprinkle with a little water and it's ready to use.

Rubber Stand
[2HS-12 2HS-13 2HS-14]

With just one whetstone sculpting tools with rounded blades, triangular blades, flat blades, and seal engraving blades can all be sharpened. The rubber stand that is included acts as a trap for water. Keep it handy for sharpening when blades become dull.

Includes an eraser for removing grime

Usage video ▶

Nowadays, they've evolved to the point where you can sharpen them just by adding water.

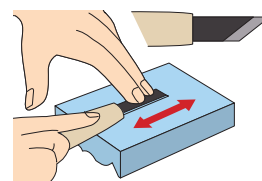

Preparation before use

Sprinkle with a little water and it's ready to use.

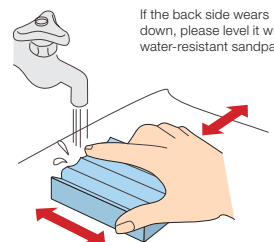

How to use the back side

Please use on the flat area on the reverse side of flat blades, on the sharpened edge of triangular blades, and on the reverse side of blades to make them level.

If the back side wears down, please level it with water-resistant sandpaper.

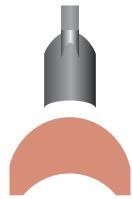

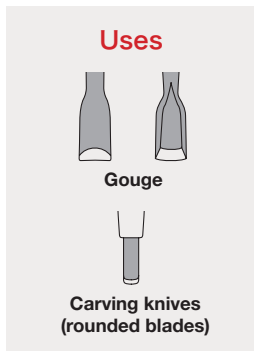

1 *Due to the fully machined finish, the actual size may differ slightly from the indicated size.

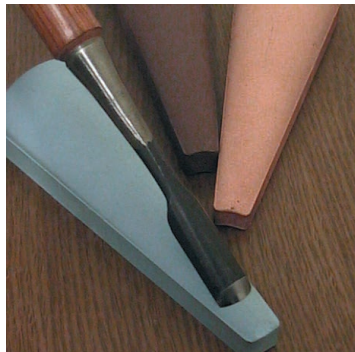

Whetstones for Gouges Non-absorbent

Sprinkle with a little water and it's ready to use.

Gouging/ Carving knives (rounded blades). Corresponds to all sizes of tapered cutting implements. It can be used on both sides to match the blade edge.

Use the inner side of the whetstone when sharpening the inner blade or removing burrs from the outer blade.

Use the inner side of the whetstone when sharpening the outer blade or removing burrs from the inner blade.

Includes an eraser for removing grime

To finish sharpening a blade, use the coarse grit first, then the medium grit, and finally the finishing grit. Please do not wash away the mud that is formed while grinding as it is needed for sharpening.

Usage video ▶

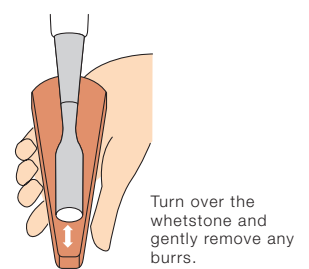

Nowadays, they've evolved to the point where you can sharpen them just by adding water.

Can be readily used with either a small amount of either water.

Please sharpen accordingly.

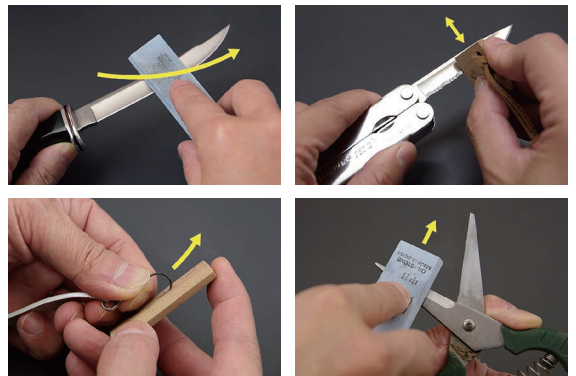

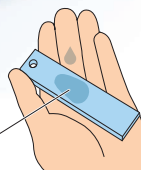

Turn over the whetstone and gently remove any burrs.

Field Activity Non-absorbent

Sprinkle with a little water and it's ready to use.

Water

"Field Activity" is the ideal whetstone for when you need to perform emergency maintenance on your knives while out fishing or camping. It is extremely compact, so you won't even notice you're carrying it. **Designed specifically for outdoor use, this product allows for smooth sharpening with just a small amount of water.** While it is hard and highly wear-resistant, the sharpening experience is smooth and comfortable. Despite its small size, this is a genuine whetstone that delivers reliable results.

Whetstone for Sickles

High-temperature fired ceramic whetstone

This double-sided whetstone with a loop for carrying has been very well received since its release, as it serves as a coarse, medium, and fine stone—fulfilling the role of two separate stones—and is extremely convenient to carry. Both the GC-C and Deluxe WA-A models are made from a blend of high-quality materials. They have been improved to be non-absorbent, allowing you to sharpen immediately with just a small amount of water.

Pruning shears whetstone

This is a portable, dedicated stick-type sharpening stone for removing sap and sharpening pruning shears. It's a non-absorbent stone that doesn't require soaking in water; simply apply a light coat of water (or oil) for smooth sharpening, allowing for quick sharpening even during breaks in work. The curved side (**one-sided tapered design**) allows for sharpening curved blades. It's ideal for sharpening blades that require maintenance in agricultural, forestry, and other similar fields.

Oilstone

Oil permeability

This is a high-hardness whetstone specifically for use with oil.

*While any type of oil can be used, the polishing power will vary depending on the type of oil. Experience the different polishing powers offered by various oils.

Square Type

General cutting tools (chisels, planes, kitchen knives—sharpening, edge adjustment, and deburring); ski edge sharpening.

Stick Type

Precision mold polishing, deburring, internal polishing, carving tool sharpening, burr removal for round chisels, etc.

Wedge Type

It is especially ideal for sharpening fishing hooks.
